

Homework 6a Writeup

High-Fi

In my interactive prototype, I already outlined what the shopping cart page would be like. It is utilizing many successful design patterns for ecommerce. I use color to emphasize methods to edit items, and ways to checkout and proceed with payment.

Elements that I changed were the placement of the placement of the item categories and information. I utilized a column format for easier navigation and identification of items. I also edited the placement of the Wishlist to provide the option to add these items before final purchase.
